

# Final Project Proposal:

# Music Artist Website

Katherine Yuh  
Prof Adee - WebDevSpring23

# Existing Website Inspirations:

- Music artist portfolio website
- handwritten/drawn elements/aesthetic
- Loading screen
- Creative nav to different pages
- Photo realistic/collage elements
- Unique cursor icon
- Unique icon for chrome tab
- A little less complicated than inspo

## Inspiration Website Link: SONY/Existing Music Artists

<https://bibibullet.com/>

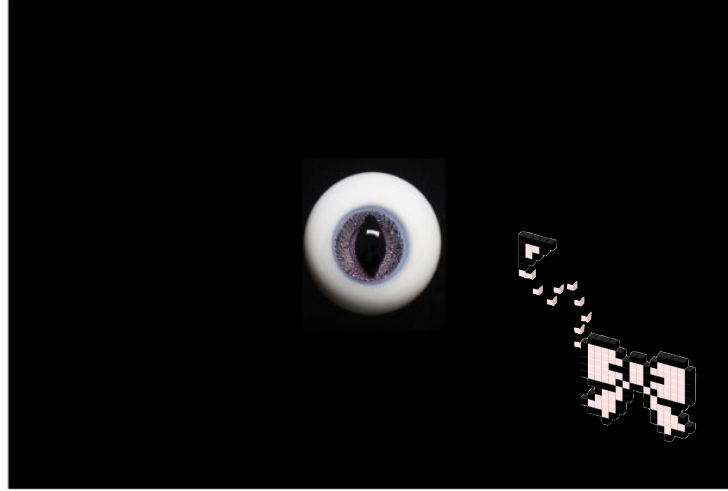

MacBook Pro 14"

iPhone 14 Pro Max

Current Wireframe/Idea

MacBook Pro 14" - 2

## Concepts/Skills I already know

- Background Color
- Font/Size customization
- Insert images + edit location/padding
- Nav for web pages
- Formatting basic text on the page
- Basic Transforms/Transitions
- Changes based on screen size/device platform
- Import gifs

## Concepts/Skills I need to learn

- Replacing default cursor with custom image
- Having a loading screen/graphic
- Customizing icon for chrome tab bar
- Use image as background, that charges
- Hitbox for certain parts of images nav to pages
- Mobile menu accordion

## To Do List:

1. Create/Generate pngs for background/loading images
2. Create nav web pages for each section
  - a. Music, Videos, Merch etc.
3. Create loading screen visuals
4. Format mobile and desktop site
5. Customize cursor icon
6. Animate objects to move upon hovering (adapt for mobile)
7. Music playing on website loading?

# THANK YOU
